

APPLICA U2

For Windows 95

A Second PC? Or a PC for Two?

There are many good reasons to buy a second PC. But there is one GREAT reason not to: Applica U2. This revolutionary product provides all the hardware and software you need to give another person the full benefits of a second PC. You simply add a monitor, keyboard and mouse.

All the Benefits of a 2nd PC

With U2, two people can each run their favorite applications. For example, while you prepare a multimedia presentation for work, your partner can surf the World Wide Web planning your next vacation. Or your child can research an online encyclopedia for her science project.

U2 comes with a card that plugs into your PC, a connector box for attaching a second monitor, keyboard and mouse, and software that takes advantage of the built-in multitasking of Windows 95. U2 also includes a 15-foot cable so that you can each work in your favorite place. (A 50 foot cable is optional.)

Surf the Internet Together

U2 allows both of you to surf the Internet and World Wide Web at the same time. You need only one modem, one phone line and one Internet connection (through an Internet Service Provider). You save by not having to install a second phone line or pay monthly charges for that extra line. With U2, the wait for the PC is over. And with the new 56K modems, surfing is faster than ever.

How does Applica U2 Work?

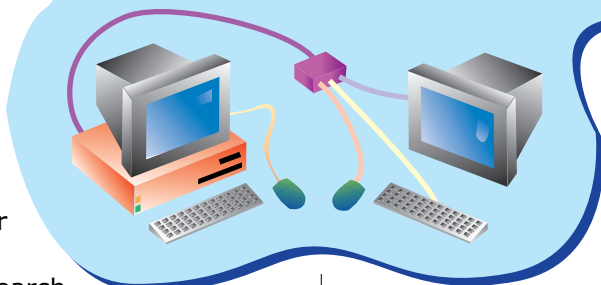

Today's PCs are extremely fast. Even when you type as fast as you can, the vast majority of your computer's processing power goes unused. The genius of U2 is that it takes that extra power and distributes it among several users, so that each of you gets the power you need, when you need it.

Work in your own Personal Environment

U2 makes it easy for you to tailor Windows 95 to your own tastes. So everyone gets his or her favorite screen colors, wallpaper, and icons. This is especially handy if you want to prevent access to certain applications or present a simple interface customized to each person's needs.

Setup is as easy as 1-2-3

- Step 1 Place the ISA expansion card in the PC.
- Step 2 Run the 15 foot extension cable from the PC expansion card to the U2 connector box.
- Step 3 Connect the 2nd user's monitor, keyboard and mouse to the U2 connector box.

A Price U2 Can Afford

You would expect to pay a lot for a product as useful and powerful as U2. After all, it offers the same functionality as a second PC would. But because of very aggressive pricing, and because much of the power of U2 comes from the PC you already have, we are able to offer this revolutionary product at an unbelievably low price.

Hint: Even if you need to buy an extra monitor, keyboard and mouse, your total cost is about one-quarter the price of a second PC.

That is why we can say: The Least Expensive Way to Add a 2nd PC User.
