- Keyword Notification
- Activity Reports sent as frequently as every 30 Minutes
- Reports sent **ONLY** when you want them
- Flexible Report Scheduling
- Works with Modems, Cable Modems, DSL and LAN

eBlaster

eBlaster is the easiest way to monitor all PC activity from a remote location. Now you can record everything your children, spouse and/or employees do on their PC and have a detailed report delivered to your e-mail address - ANYWHERE.

Once installed on a PC, eBlaster sends activity reports to a remote e-mail address you specify. Activity reports include a detailed record of all web sites visited, applications launched, keystrokes typed and, optionally, screen snapshots.

You no longer need physical access to the PC you wish to monitor.

eBlaster is extremely flexible, allowing you to specify the times and days of the week to record activity and send reports. Send reports as frequently as once every 30 minutes or once every day - its up to you.

Administration

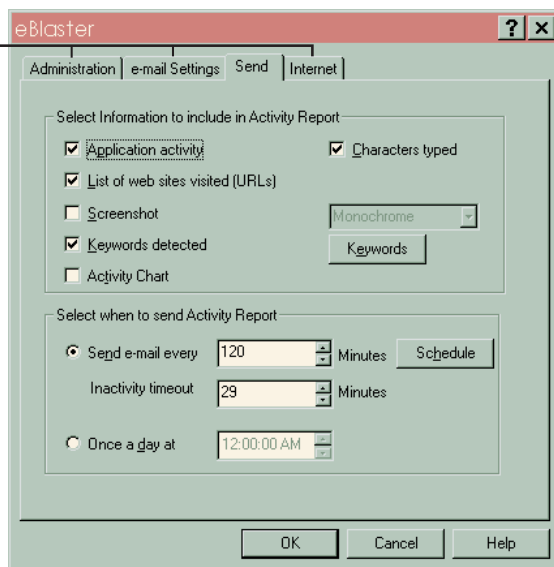

- Password protect your eBlaster settings and lock out access to unauthorized users.
- Set Hot Key for quick access to eBlaster Settings Control Panel.

E-mail Settings

- Define the E-mail address you wish to have eBlaster Activity Reports sent to.
- Modify the text that will appear in the Subject line of incoming eBlaster E-mail reports.
- Advanced E-mail settings for corporate use.

Internet

- Identify the connection method used by the PC to access the Internet (Standard ISP, AOL, Cable Modem, DSL, etc...)

The eBlaster Settings Control Panel provides easy access to multiple options that will have you up and running in no time. Enter a password to protect your settings from being accessed by an unauthorized user. Define the E-mail address that you wish to have eBlaster Activity Reports sent to. Choose the information you want to include in the Activity Report (screenshot above). Your report can include any of the following: Application Activity, list of all Web Sites Visited, Keyword Detection (you define the keywords that eBlaster looks for), Activity Chart, and/or Keystroke Log. Optionally, eBlaster can send a screenshot as an attachment within your Activity Reports. Select how often eBlaster sends reports or use the intuitive Schedule feature for more precise timing.

As a parent, you no longer have to wait until you get home from work to find out what your children have been doing on the Internet. If you have to go away for business, you don't have to wait days or weeks to see what your children have been doing online. You can now find out from anywhere in the world!

As an employer, you can get hourly or daily reports of all the web sites your employees are visiting, as well as everything they are typing. Are the mice playing while the cat is away? They won't be, if you have eBlaster!

System Requirements

For Computer Being Recorded:

- Windows 95, Windows 98 or Windows 2000
- Pentium-based PC running at 100 MHz or faster
- 16M of memory (32M for best performance)
- Internet Access
